

FLEXIDINGERS POP-UP AND CAP & LINING

Plastec Flexidingers are flexible connectors, ideal for accommodating varying angles and gradients where space below spas and baths is limited.

Supplied with a flexible tube with a smooth internal bore, Flexidingers are designed to facilitate movement of the spa/bath when subjected to large volumes hot water.

Flexible tube is suitable for solvent welding and is supplied as part of Flexidinger products at 300mm in length, which can be cut to a desired shorter length if required.

ID			FINISH	
POP-UP
